

Greener Ugborough Parish Meeting and Public Talk

Wed 19th October at 8pm
Ugborough Village Hall

Our guest speaker - Henry Wainwright from Bigbury Net Zero - will be taking us through a hands-on demo of thermal imaging cameras, which can identify heat loss from buildings & identify ways to make our homes more energy efficient. With volunteer support, we will then be able to use the equipment here - saving energy, bills and chills. Funded by SHDC, this initiative is applicable to local business premises and public buildings as well as homes so please spread the word.

There will also be a update on other projects.
